

Team Name:

Decepticon

– *A nod to ethical A.I. practices.*

Team Mates:

Munachisom Benson: w216459591@student.hccs.edu

Jasmine Campos: w208985692@student.hccs.edu

Martin Demel W216901110@student.hccs.edu

Jiri Musil W216916125@student.hccs.edu

Team Motto: Optima Semper

Team Song: Mr. Roboto

Team Strengths:

- **Analytical thinking** – to be utilized in processing raw data.
- **Programming** – each team member is dedicated to training ethical machine learning models.
- **Resilience** – we could've been the ultimate team alongside our other assigned members, but we lacked the strength needed to beat Optimus Prime. We're practically the last two standing and we need these mods and buffs to stand a chance.
- **Technical Writing** – to ensure our objective is clear and easy to follow.
- **Innovative** – Team Decepticon will use innovation and creativity to explore data to define patterns not easily detected.

The strengths outlined are both JC and MB. Through strategic planning, communication, and deployment of these strengths we will tackle the coursework given.
